### **DETAILED ACTION**

1. This action is in response to the amendment filed on 7/8/2011.
2. Claim 13 has been canceled. Claims 14-17 have been amended. Claims 14-17 are pending for consideration.

### ***Response to Arguments***

3. Applicant's arguments, filed on 7/8/2011, with respect to claim 13 have been fully considered and are persuasive. The rejection of claim 13 has been withdrawn.

### ***Allowable Subject Matter***

4. Claims 1-12 and 14-19 allowed.
5. The following is an examiner's statement of reasons for allowance: the prior art fails to disclose *"a message M in a signcryption operation using an IBE private key of the sender SKA and an IBE public key of the recipient IDB that is based on the recipient's identity to generate a ciphertext C that is a signed and encrypted version of the message M and at the recipient or at a third party, after the ciphertext has been decrypted by the recipient, performing, with computing equipment, signature verification in an operation that is separate from the decryption of the ciphertext, wherein performing the signature verification comprises using the decrypted message M and the IBE public key of the sender IDA to prove that the sender signed the message M"* as recited in claims 1 and 18.

The prior art further fails to disclose *“obtaining, with computing equipment, an identity- based-encryption (IBE) private key of a user; using the IBE private key to compute, with computing equipment, a commitment to a secret value and a corresponding decommitment; and using a symmetric key that is based on the IBE private key to encrypt, with computing equipment, at least one of the commitment and the decommitment, wherein using the symmetric key to encrypt comprises: concatenating the decommitment and a message; and using the symmetric key to encrypt the concatenated decommitment and message”, “wherein using the symmetric key to encrypt comprises: concatenating an IBE public key with a message and the decommitment; and using the symmetric key to encrypt the concatenated IBE public key, decommitment, and message”, “wherein computing the decommitment comprises performing multiplication on an elliptic or hyperelliptic curve” and “computing the symmetric key that is based on the IBE private key by performing a bilinear pairing calculation on an elliptic or hyperelliptic curve”* recited in claims 14-17.

The Examiner was unable to find a teaching, suggestion, or motivation that would render the above limitations obvious. Claims 1-12 and 14-19 are, therefore, novel and not obvious.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled “Comments on Statement of Reasons for Allowance.”
